WELCOME TO BENELKAY

Andrew, Jules, and Georgie are pleased to extend an invitation to you to attend our 13th annual Benelkay Poll Santa Gertrudis Bull Sale on Thursday the 22nd of August 2024 at 1.00pm on property "Glenmore" Mullaley. This is the week of Ag-Quip this year, so book accommodation early in Gunnedah and surrounding towns please.

We are pleased to present to you our line-up of forty Poll Santa Gertrudis bulls, with 50% being Homozygous Poll. I feel confident with the overall quality and evenness of the sale team, with an outstanding number of Yarrawonga M134 (PS) and Yarrawonga Quicksilver (PP) bulls represented in the sale draft. We are very proud to offer this year's group of sale bulls and feel they are of the highest quality we have offered, mostly due to the high standard of our own sire battery we are using over our 400 stud cows.

This year we have DNA Sire tested our sale team so you the buyers can have every confidence in the parentage of the sires you are buying from our Stud. We are offering a range of types of bulls to suit different market requirements and realize not all bull buyers are looking for the same type of bull for their operation. We have aimed to keep abreast of the beef industry and have made considerable investments in poll sires in the past forty years to produce seed stock bulls to suit both the commercial and stud sectors. We have started using our own Homozygous Sires to increase this trait within our own female stud herd, with very pleasing results.

All bulls will have BreedPlan figures to assist you in the selection of the sire to suit your breeding objectives. Also, what must be realised is that we buy in all our sires from non Breedplan herds, as these bulls have many other traits we are chasing in our herd, and we need to have other genetics coming into the system of Breedplan. The downside of this consequence is it does take a few years to get reliable data on the un- Breedplan, non-proven Breedplan bulls. Due to this most of our sires start below breed average for all their data so it does take a while to get the amount of progeny on the ground and tested to get the accuracy of the Breedplan traits comparable to herds only using Breedplan bred sires.

We will also have raw data figures for weight, DWG, scans for EMA and Fats. All bulls are semen, morphology (Laboratory Morphology examinations done by QMSL - Goondiwindi) and vet tested by Mark Baker, Gunnedah Saleyards Veterinary Clinic. Our aim is to provide paddock reared fit and healthy bulls, so cattlemen can be confident in their bull purchases. You can view pictures of the sale draft at www.benelkaysantas.com.au or contact Andrew 0427 435 201 directly for more information or to arrange inspections presale if you feel that it will assist you. Looking forward to catching up with you all on sale day.

DIRECTIONS

With navigators use Keechs Rd Goolhi as a reference point,
with google use Benelkay Santa Gertrudis Stud.

FROM GUNNEDAH

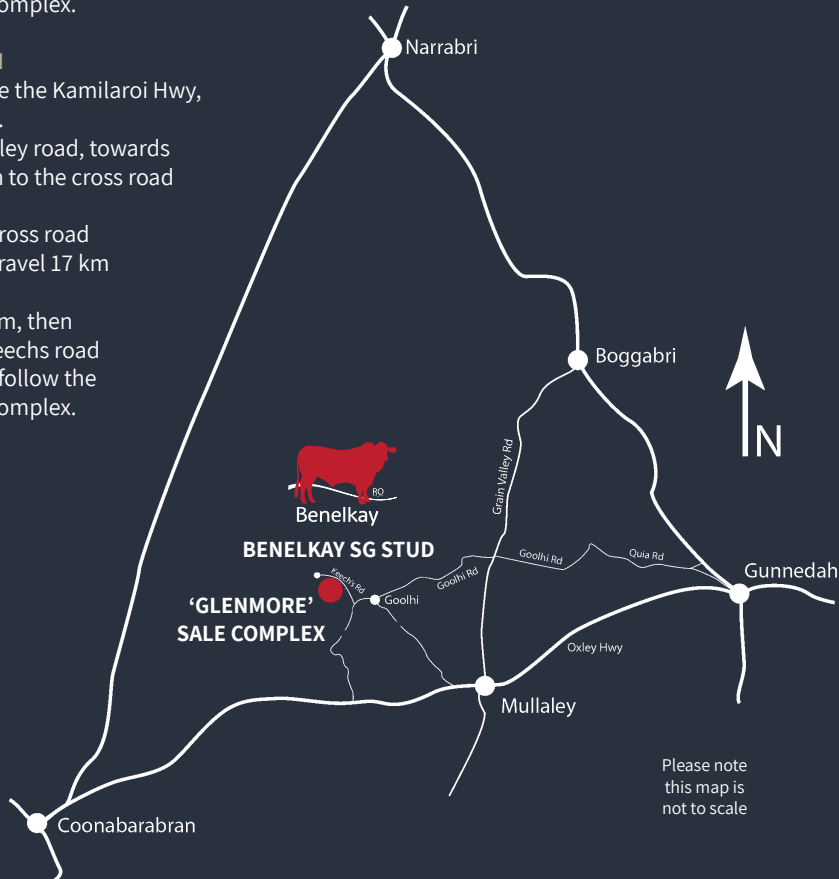

From Gunnedah take the Oxley Hwy,
34 km's to Mullaley.
Pass through Mullaley on the Oxley Hwy and
travel 5km's towards Coonabarabran, then turn
right onto the Booloolah road, to Goolhi.
15km to Goolhi, turn Left and go 3 km, then
turn Right onto Keechs road.
6.5km on Keechs road, (gravel) and follow
signs to the sale complex.

FROM COONABARABRAN

Take the Oxley Hwy 54km towards Mullaley;
turn Left off the Hwy to Goolhi.
10km down the gravel road, turn Left, as you
come onto the tar, onto Keechs road (gravel).
Go 6.5km on Keechs road; follow the signs to
the sale complex.

FROM NARRABRI

From Narrabri take the Kamilaroi Hwy,
55km to Boggabri.
Take the Grain Valley road, towards
Mullaley, for 34km to the cross road
intersection.
Turn right at the cross road
intersection and travel 17 km
to Goolhi.
Go past Goolhi 3km, then
turn Right onto Keechs road
(gravel) go 6.5km follow the
signs to the sale complex.

SALE INFORMATION

HEALTH - VACCINATIONS

7 in 1, Vibrio, AD&E, Multimin and Botulism Vaccinations have been done on the 03.01.2024 and 18.05.2024. All sale bulls have received two shot this year and should receive a booster to fall into your own breeding program.

Benelkay stud is in a Bovine Johne's disease protected clean area. There have never been any traces of this disease detected at our stud's properties. We have completed a Grazing Manual Biosecurity Template, version 1.1 before the 30/06/2017. There has been veterinary oversight into the development of our biosecurity plan, as we aim to remain a J-BAS 6 score.

TREATMENTS

All bulls have been treated on the 03.01.2024 with Ivomec pour and on 18.05.2024 with Cydectin pour on.

FEEDING

The Sale Bulls have been running together in a large mob of about 100 male cattle since weaning. From January 2024 they have been run on forage sorghum in a sale mob of bulls of around fifty, then cut down to a mob of forty in mid-June and split into paddock and Sale bull mobs. Then in June 2024 the bulls have been running of forage oats with a light supplementation of Hay, grain and canola meal.

HANDLING

All bulls are handled with four-wheel motorbikes and dogs. Our bulls have

never been handled with horses. All bulls are quiet but as we all know they can react differently when put into pressure situations or different surroundings, particularly on sale day or being transported as they have never left the property.

SEMEN / MORPHOLOGY TESTS

All bulls have been evaluated for breeding soundness and semen tested by Mark Baker, BVSc & Associates of Gunnedah Saleyards Veterinary Clinic. Testing will be done over two days 25.06.2024 and 26.06.2024. Morphology testing has been carried out at the Goondiwindi Laboratories QLD. Individual morphology results will be available on sale day.

SCANNING

All bulls have been scanned for EMA, Fat (Rib, Rump, IMF%) and Scrotal Size Measurements, by Bovine Scanning Services (Lonnie Stone). This will be conducted in early August 2024. The raw data will be available a few days before our sale on social media and our web site as well as hard copies on sale day.

AUCTIONSPLUS

The sale will be interfaced with auctions plus, for clients that cannot attend on sale day, please organize with your agent at least 24h hours prior to sale day. Phone bidding can be organised through Elders Gunnedah, contact Jon Glover 0428 486887 Nick Hannaford 0417 201460 or Brian Kennedy, Elders Stud Stock 0427 844 047, there is good mobile phone reception at the bull sale venue.

CROSS BREEDING BENEFITS

Benelkay clients are gaining advantages cross breeding using Benelkay Bulls over their British/Euro female herds.

Heterosis or Hybrid Vigour: meaning, difference of performance of vigor of crossbred progeny from the average of the parental breeds.

When looking at breeds of cattle the breeder must consider their country, the environment, where their cattle are run. Their end goals for their cattle and the markets they want to sell to. They also need to be honest with themselves when they consider these realities. Too often, the selection criteria stops at the colour of the coat and or the breed. What breeders need to look at is Weight for Age. Cattle breeding is all about how much money is in your pocket when you sell your cattle not the highest cents for kg.

This is where a crossbreeding program using Benelkay Bulls will pay the bills with increased weight for age, hybrid vigor, fertility and doing ability.

Hybrid Vigour from crossing two British breeds together is of a lower rate. Using a Benelkay Bos Indicus Bull over a British or Euro is a free twenty percent extra weight for doing very little. The more distantly the parental breeds are related, the greater amount of hybrid vigour can be expected.

Hybrid vigour is greater for fitness traits related to reproduction, survival / mortality of cattle (which usually have lower heritability).

Ultimately our final aim should always be “weight of carcass produced in the shortest time possible”.

LOOKING AFTER YOUR NEW BULL

We have put a lot into getting your purchase ready with breeding and management and now it is up to you to continue to prepare your considerable investment for the future.

THE FOLLOWING ARE A FEW TIPS

- At auction sales, remember that possession is yours after the fall of the hammer.
- We recommend that you insure your bull - it is a new asset to your property.
- Pen bulls on the truck from different vendors / properties separately.
- Handle him quietly at all times, no buzzers have been used on these bulls.
- Have some cattle in the yard for company to run him with for a week or so to get acquainted to your property. All will be strange to him as he has been taken from his mates and even the water and feed will be different as well as your environment.
- Check the health treatments he has had and that they are appropriate to your area and treat with anything additional you think he might need after he has settled in.
- At joining it is preferable not to mate young bulls multiply with older sires, as they will not allow the young bulls near the cows and they could get injured.
- Try and get him to his selected group of cows preferably in a group with other cattle or bring the group to him.
- Check him regularly, seeing he is walking well, no swelling of joints or in his sheath, if possible that he is serving and that not too many cows are returning to heat.
- If you suspect any problems occurring quick action may cure a problem before it escalates.
- Have a spare bull or bulls available to cover any break downs, do not give the young bull increased numbers of females to cover other breakdowns within the herd. Also young heifers may be in season for less time than cows and you will need more bulls to cover them.
- After the joining remove him and give him any health treatments such as for internal and external parasites and any vaccinations appropriate to your conditions.
- Give him every chance to grow out and develop after his first joining as your Santa bull will continue to grow and be cutting teeth, for at least a further twelve months.
- Annual pre joining vet examination will help with your next joining results.
- Bulls are a large investment for any breeding herd and they have a major effect on herd fertility. A little time and attention to detail to make sure they are fit, free from disease and actively working is well worthwhile and can deliver huge results to our agricultural businesses.

If you have any queries or problems please contact us as soon as you can so that we can assist you.

BREEDNG OBJECTIVES / Our breeding objective is to produce structurally correct moderate framed Polled Santas, balanced in fertility traits, weight traits, muscling and fat. Always mindful of maintaining an easy doing functionally efficient and fertile herd, with a broad genetic base to meet the current market needs of our clients and to improve the profit in their operations.

TO ACHIEVE OUR OBJECTIVES WE EMPLOY THE FOLLOWING STRATEGIES:

FERTILITY

- We don't pamper the stud cow herd; they are run on a commercial basis, in conjunction with cropping. This strategy indicates the cattle that will perform especially for fertility and gives clients confidence that the sires they purchase will perform in any climate.
- Semen and morphology test bulls and use as high a quality tested bull that meets our breeding objectives.
- Maintain soft fine haired cattle. These perform better in our climate and are more fertile.
- Select for cattle with above breed average fat. Fat is important for carcass coverage (MSA), doing ability leading into better fertility.
- Keep a balance between milk and fertility traits.
- Identify sires that have excessive birth weights.
- Select for cattle with tidier sheaths. This gives us much better fertility in both bulls and females also complying better with the MSA requirements.

MATURITY/MEAT QUALITY

- Select for moderate framed cattle with above breed average young growth.
- Select cattle that are able to perform well in a range of markets for clients.
- Our style of Santa Gertrudis cattle are able to target the vealer market, the feed lot and all the way through to the bullock trade.
- Select for quiet temperament for handling and meat quality issues.

INFORMED DECISIONS

- All cattle are performance recorded for as many traits as we can manage, keeping in mind commercial considerations. E.g. we don't scrotal score all male calves as we castrate a large number of bull calves.
- Performance data is used in mating decisions to produce balanced progeny.

STUD FOCUS

RO

With a strong genetic base of 400 classified stud cows, Benelkay is well placed to breed cattle to suit the modern-day commercial cattleman. With a strong emphasis on poll cattle that can have the ability to enhance the carcass traits in the stud and commercial cattle industry. We have selected and used only poll sires for over Forty years giving us a large genetic poll base to draw from. This year's sale team will have over half Homozygous (PP) bulls represented which gives the industry an opportunity to be able to purchase sires to fast track their own herds towards poll genetics. These results will be on the supplementary sheet or ring us presale. The Benelkay stud is run on a commercial basis with no favouritism. With years of work going into the fertility, temperament, and the need to breed cattle that are soft, easy doing and are saleable all year round. We have found this style of cattle can compete with and better other breeds, but still retain the excellent attributes of the Santa Gertrudis Breed. We have noted over time that moderate cows have the best fertility, and we can move a little each way with size to suit the needs of most beef markets. Our entire herd is performance recorded, all stud and commercial cows with Santa Gertrudis

Group Breedplan. We find Breedplan, a useful tool in our herd selection, as well as using visual assessment. Both tools enable us to make fast gains in the desired traits we believe our herd needs to be achieving.

Sires in the past years making an impact on our stud's direction, have been, Sanford Vale Juggler (P). Wave Hill F73 (PS), Wave Hill Napperby (P), Bullamakinka H82 (PS) and Bullamakinka Dreamtime (P). Also, SuJo First Class (P) who has proved to be a wonderful sire, taking the stud forward in the direction, we believe the industry needed to be heading. His progeny has had a huge impact within the stud, and we are still benefiting from his strong bloodlines. Yarrawonga M134 (PS) and Burrumurra Boss 152 (PP) are both creating their own history within the stud in the last few seasons with outstanding results. Every year we try to bring new genetics into the sale for our clients. This year we are proud to introduce new Sires Nioa Quartermaster (P), Bullamakinka Remington (P) and Strathmore Ripper (PS) they have all introduced fresh genetics within our herd and have contributed to the sale team very positively.

SIRE PROFILES

SIRE OF LOTS 2,3,5,8,16

YARRAWONGA M134 (PS)

Purchased at lot 4 for \$38,000 in the 2017 Yarrowonga Waco Annual Bull Sale. M134 (PS) a son of Waco Zeus, at 25 months he weighed 900kgs, DWG 1.20, EMA 121, 40 cm scrotal and had a 93% morphology. Purchased for his Santa

Gertrudis phenotype, thickness, depth, heavy bone, and quiet disposition. M134 is proving to be our go to sire, he has exceptional fertility siring over eighty calves in a single season. Placing him as the top sire for progeny recorded in one season within the Santa Gertrudis Breed. He has developed into a mountain of a bull and is breeding exceptional progeny both male and female, with his classification rate of his progeny being well over 90%. He is producing what we are aiming for with his consistency of breeding quality, strong poll cattle that carry all the attributes producers are looking for in, Santa Gertrudis cattle. Top priced son to date is Benelkay Renovator R014 (PP) who sold for \$50,000 to Ben and Amanda Adams Dangarfield Santa Gertrudis Stud in 2022. In the 2022 sale his twenty-one sons sold to average \$15,500 with eleven of these selling into studs.

SIRE OF LOTS 1,4,7,12,18,19,21,23,29,30

YARRAWONGA QUICKSILVER 680 (PP)

Purchased at the Yarrowonga Waco Annual Bull Sale in 2020. At twenty months he weighed 784kgs, 40cm scrotal, 1.18 DWG, EMA 128, Rib and Rump fats of 12 and 9, as a bonus he was a homozygous Poll (PP). He has developed into a big strong sire with plenty of length and scale. We were attracted to his sire Restdown 378 (P) when Yarrowonga purchased him and thought we would purchase one of his sons. He is breeding very dark coated stock with strong breed type, there is a strong representation of his sons on offer this year.

SIRE PROFILES

SIRE OF LOTS 13,15,17,25,27,28,32,35,37

YARRABEE INFORCE 1459 (P)

Purchased as the top priced bull at the Yarrabee 2020 Annual Sale at Emerald. He has developed into a Sire with plenty of volume, scale and thickness. When purchased at twenty – four months he weighed 900kgs, DWG 1.17, 150 EMA, Scrotal of 41cms. He is a very active bull siring plenty of calves in a short period of time. Inforce is a strong powerful sire with a lot to offer. He has been breeding consistently, both male and female progeny, his stock carry great carcase consistency and it will be exciting to see what his heifers will bring to the stud in the future years.

BENELKAY NEWMAN N330 (PP)

Kept for two joining seasons before being sold locally he was used over a select number of cows with outstanding results. Very dark in colour with a fine skin type, exceptional muscling and the bonus he was a homozygous Poll (PP), we felt we could breed some very attractive cattle out of him. Newman has not let us down as can be seen in the bulls on offer within this sale team. Strong carcase attributes that would suite both stud and commercial producers.

SIRE PROFILES

SIRE OF LOTS 14,20

BURRAMURRA BOSS 152 (PP)

Boss a Homozygous poll was purchased as a led bull at the 2016 Santa Central Sale for \$17,000. Weighing 891kgs at 22months with a DWG of 1.30kg, Scrotal of 40cm and an EMA of 122. After watching him win his class at the Ekka we thought we would purchase him for his

out cross genetics, growth, tropical dark skin type and quiet temperament. Boss has grown into an eye appealing sire, great thickness, and good depth with plenty of scale. He has thrown progeny with strong breed character, and we are seeing strong results through his females in the breeding program. Boss produces exceptional females with scale and breed phenotype. We are pleased with both his male and female progeny. Top priced son to date is Benelkay Quartermaster Q012 (P) selling to Jock Cunningham "Hallcraig Santas" for \$30,000 in 2021. Benelkay Newman (PP) has also been kept as a sire with sons in this year's sale. Boss is a sire that throws consistency in his progeny producing scale, thickness and heavy bone progeny with dark red coat colour that is hard to purchase. It is pleasing to see his sons making an impact in the studs they have been sold into.

FIRST RELEASE - SIRE PROFILES

BULLAMAKINKA REMINGTON R294 (P)

Remington was purchased at the 2020 Santa Central sale as a lead bull. We were attracted to him for his strong thickness width over the top line, length and his dark red coat type. His temperament is impeccable and is a pleasure to work with as are his progeny. He was caring strong EMA and IMF what we were after as well as good scrotal size. We are happy with the quality and evenest of his first two drops of calves and believe we will see a lot of his sons in the years to come.

SIRE OF LOTS 31,38

STRATHMORE RIPPER R280 (PS)

Ripper was purchased in the 2020 Strathmore on Property Bull Sale at Blackall for \$40,000. We were attracted to him for his out cross genetics overall thickness, quiet disposition and Sire appeal. He had large EMA and IMF figures that we were also attracted to as well as a strong morphology result. As he was purchased late in the joining season there is only a few of his young sons in this sale team and we will see more of them as the years progress.

SIRE OF LOTS 9,22,36

NIOA QUARTERMASTER Q34 (P)

Quartermaster was purchased at the 2020 Nioa on Property Bull Sale. We were impressed with this bull's style and his genetics. Being an (AI) son of the prolific sire Rosevale Jackeroo and out of a Glen Oaks show heifer. His BreedPlan figures for Rib and Rump fat were strongly positive which was also a contributing factor. He is breeding cattle with strong phenotype and is throwing on his ability to lay down condition, we are happy with his overall contribution to the stud.

FIRST RELEASE - SIRE PROFILES

BENELKAY RUFUS R148 (P)

Rufus a Yarrowonga M134 son was sold in our 2022 bull sale to Linsay O'Brian Solheimar Santa Gertrudis stud for \$7,000. Through Sire DNA testing of the sale bulls, we

uncovered he sired one of the sale bulls as a 9-month-old bull calf still on his mother, early sexual maturity you would assume as a favourable trait in his sons.

BENELKAY ROMANCE R106 (PP)

Romance a Burrumurra Boss son was again sold in our 2022 Bull Sale to Bruce Cameron the McGills for \$6,000. DNA testing once again found that he was working at 9 months of age as some of the heifer calves in the paddock

matched as in calf to him. Pleasing that we can get Sale bulls out of mistake joinings proving the quality of middle priced Benelkay sale bulls competing with sires we have outlaid a considerable amount of money for.

THANK YOU

We wish to thank you for attending our
13th Annual Benelkay Poll Santa Bull Sale in 2024

Thank you to the Emerald Hill Progress Association for catering and
The Coffee Float for their Coffee and Tea

We appreciate all our friends Agents and Clients, the successful purchases
as well as the under bidders who made the day what it has been.

Please have a safe trip home and we invite you back on
Thursday 21st August 2025 for our 14th Annual Sale.
